

Winter Solstice 2016

December 22, 2016

(Channeling begins)

Djwhal Khul here. Tashi Delek.

Alright here. Well, the topic is Winter Solstice and the energy of bringing as much light as possible into the planetary energy field.

So I'm going to suggest an exercise in pulling in beams of light, so like a spotlight shining down on you. Maybe move over a few feet or you walk towards your vehicle or something and you bring the beam with you so you're getting beam after beam after beam of light coming in and anchoring down in different places on the planet, so you can assist in ushering in that Winter Solstice 2016.

Alright Dear Ones. As always, thank you and my love to you.
